PRIME ANNOUNCES CLINICAL TRIAL DATA ANALYTICS SOLUTION FOR LIFE SCIENCES COMPANIES

September 15, 2014 (Wayne, PA) – Prime Technology Group, LLC, a leading provider of business consulting services, today announced the launch of its comprehensive clinical trial management system software. This system is a data-driven methodology and actionable information methodology, that uses data to provides visibility to the right process guidelines for life sciences, biotech and medical device companies.

Prime offers unique, proprietary clinical trial and data support solutions that allow companies to monitor their clinical trial registration and results reporting compliance, while mitigating clinical trial disclosure risks. In providing accurate, automated clinical trials management system, Prime enables companies to develop a focused strategy with its integrated, user-friendly portfolio of software platform offerings.

The clinical data support system software helps companies to keep tabs on all progress levels of the clinical trial stages of the drug development process. The software is developed in accordance with contemporary international standards, HIPAA and industry best practices. The company aims to offer products and services that deliver clinical and economic value to healthcare consumers and providers around the world.

“Prime firmly believes in responsible data safeguarding and fostering greater transparency and accuracy with patients and researchers alike,” said Sudhakar Goverdhanam, Prime’s Chief Executive Officer (CEO).

“In clinical trials, protecting the privacy of individual participants is most important. Hence, our newest offering of scientific Clinical Trials cum Data Support system software allows Life Sciences companies to securely meet all data safety standards required for individual-level participants, patients, clinical study reports by academic institutions, including even third-parties. We are excited that our expertise in developing fully integrated clinical trial and data support solutions promises to enhance clinical trials and broaden clinical research investments for clients worldwide,” added Mr. Goverdhanam.
